Our future!

or

impfen-schuetzen-testen.de

We're stronger when we're vaccinated!

So, get vaccinated. Get protected.
Get tested.

Niedersachsen. Impft. Klar.

Why?

- **COVID-19 vaccination offers the best protection against getting seriously ill.**
Serious cases of illness from coronavirus infection are not limited only to older people. More and more younger people who haven't been vaccinated are becoming seriously ill and need treatment in hospitals.
- **More people vaccinated = More normality!**
Vaccination helps you to stay healthy, live as worry-free a life as possible and get back to normality again.
- Still uncertain about why getting vaccinated is so important? You can find detailed information on our website!
