**We're stronger when
we're vaccinated!**

So, get vaccinated. Get protected.
Get tested.

Niedersachsen. Impft. Klar.

Why?

- **COVID-19 vaccination offers the best protection against getting seriously ill.** Serious cases of illness from a coronavirus infection are not limited only to older people. More and more younger people – and especially people who have not been vaccinated – are becoming seriously ill and need treatment in hospitals.
- **Important:** You will only be well protected when you are fully vaccinated. And this includes getting a booster shot.

You can find detailed information on our website.
